Restriction Action

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 19-21 are drawn to prediction, classified in class 706, subclass 21.
  - II. Claims 13-18 are drawn to pricing, classified in class 705, subclass 402.
2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are as follow:  
  
Group I has selecting some of a plurality of contents to be transmitted to each of said information-processing terminals on the basis of said expected value while group II does not have selecting some of a plurality of contents to be transmitted to each of said information-processing terminals on the basis of said expected value and group II has acquiring a fee of transmitting said content for a response rate while group I does not have acquiring a fee of transmitting said content for a response rate.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
